0.1 Context

Checklists are a highly effective way to make sure that critical elements of a routine are done. As such, I want to explore and make checklists for different things that are important in my life.

1 Life

- ☐ Did I eat 3 meals today?
- ☐ Are time-based events scheduled in the calendar?
- ☐ Are repetitive events scheduled in the calendar?

2 Software development

- ☐ Is the feature implementing all the desired use cases?
- ☐ Are tests written to cover the common case and some edge cases?
- ☐ Are tests passing?

3 Machine learning

- ☐ Is there a row of data even when the value is 0?
