

Closing tabs

Tom Rochette <tom.rochette@coreteks.org>

1 Why tabs are kept open

- Want to read but
 - Too long -> Transfer to pocket
- Want to watch but
 - Too long -> Add to a youtube watchlist (which I'll never watch)
- I need them open to quickly enter data
- I want to watch them again and again
 - Download with youtube-dl and watch using VLC
- Would maybe read one day, but definitely not now (very low priority)
 - Transfer to pocket

2 Rules

- If a tab is scanned more than 5/10 times, it goes into the backlog bin
